Operation Manual – duplicate a 125Khz HID Proxdata Card ID

[1] insert 2 x AAA battery here

[2] power switch on (Power LED will flash per second)

(Low battery - if found fast "power LED" flash and "beep sound" keep continuously, need change a new battery)

[3] Place a HID proxdata card or tag on the reader's detection area .

[4] press "Read" button ,

If the card format is correct , "Read" LED will on and "beep" 3 times

(If the card is not supported , No response from the reader)

[5] take away the HID proxdata card and place a (HID-RW-T1) HID RW Card on the reader's detection area.

Press "Write" button one time → "Write LED" will keep on and beep 3 times

(If card type is incorrect, No response from the reader)
