

HI-R-W26-PCB

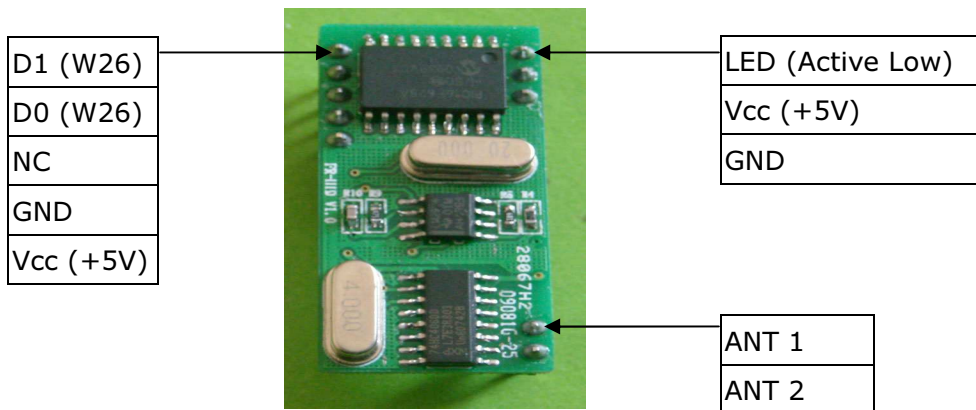

125Khz HID compatible RFID Reader PCB module with wiegand 26 bit output Interface

Features

- Frequency : 125Khz
- support protocol : HID compatible protocol
- power : +5 VDC
- read card serial No only
- PCB module with external antenna
- effective distance up to 3-5 cm
- Less than 100ms decoding time
- Low power dissipation with single power supply
- output interface : wiegand 26 bit
- module size : (38x18)mm
- external antenna size : (55x85)mm

Pin Assignment

Wiegand 26 Data output format

6 digit (3 Byte Hex) Card ID	CR	LF
------------------------------	----	----
